

# Journeyman/Master Plumber

## Exam Prep Course

April 20 - 22 | July 20 - 22 | September 21 - 23

CITC - 646 Mariposa St., Denver

### Preparing for the Journeyman or Master Plumbers Exam?

This 3-day class, instructed by Joseph Montoya, Master Plumber & Chief Building Official at Town of Castle Rock, will help you prepare to pass the written, multiple choice and practical sections of the journeyman and master plumber exams. We will review the IPC, IFGC codes, including the Colorado state adopted code amendments, and will help you apply the requirements of these codes/amendments to the installation of plumbing systems.

Topics covered include:

- the currently adopted codes, namely, the International Plumbing Code (IPC), the International Fuel Gas Code (IFGC), and the Rules and Regulations as adopted by the Examining Board of Plumbers
- a step-by-step demonstration (out of appendix E) of water and waster pipe sizing
- how to navigate the code book and test to the code in order to pass the exam

Once completed, you will be able to answer questions on the following categories covered in the written examination: cross connections; calculations and blueprint reading; combination waste and vent systems; hangers, supports and system protection; indirect and special waste piping; installation techniques; plumbing fixtures; sanitary drainage systems; storm drainage systems; traps, interceptors, separators; vents/venting; water distribution systems.

**This is a class for you if you want to improve your overall chance of success for passing the Journeyman or Master Plumber exam.**

NOTE: You will need to bring the 2018 International Plumbing Code book to this class.
